

Aerospace Electromagnetic Clutches & Brakes

Power Transmission Solutions for the
Aerospace & Defense Market

Aerospace Electromagnetic Brakes: Stop Loads and Hold Position with Precise Control

Typical Applications

- Motor Brake
- Planetary Gearboxes
- Winch Systems
- Flap Actuator Holding
- Robotic Arm Holding
- Cargo Roller Stops
- Ball Screw Drives
- Drones/Munitions
- Tensioning Systems

Aerospace Electromagnetic Clutches: Transmit rotational energy with the speed of a switch

Typical Applications

- Alternators
- Motors
- Gearboxes
- Instrumentation
- Actuators
- Valves
- Starters
- Drive Line
- Compressors
- Pumps
- Transmissions

Partnering with Formsprag Clutch Provides:

Precision Manufacturing

Advanced grinding and friction control

Quick Turn Around

DV samples in weeks instead of months

Creativity and Vision

Technical help and advice to yield
success for your programs

Best Product for your Application

Meeting customer's Expectations is the
heart of the Formsprag Vision Statement

AS 9100 Certification

Rev C Flag is proudly displayed both
inside and outside the Warren MI Facility

Decades of Experience

Formsprag started with aerospace
clutches on the B52

Products Include:

SSB Power Off Brake

DC current is applied to the field coil releasing the brake rotor allowing free rotation. When the current is dropped, the brake is engaged by spring force.

Electromagnetic Friction Brake

DC Current is applied to the field coil causing the rotor to clamp against a stationary friction surface thus stopping rotation. Current is dropped to release the brake.

- Friction Clutches
- Tooth Clutches
- Slip Clutches
- Permanent Magnet Clutches
- Magnetic Particle Clutches
- Clutch Couplings

SYDNEY

Unit 1, 11 Penny Place
Arndell Park, NSW 2148
Sydney, Australia

MELBOURNE

Suite 36,
Level 2/222 Lonsdale Street
VIC 3000, Melbourne, Australia

MACKAY

14/20-34 Caterpillar Drive
Paget, QLD 4740
Queensland, Australia

PERTH

271 Great Eastern Highway
Belmont, WA 6104
Perth, Australia
