

MRA Disc Brake Caliper - Pneumatically Applied, Spring Released

Nominal dimensions given For caliper dimensions see DS2000 140 dia [5.51 dia] G3/8 (3/8" BSP) 0 ĒΟ 0 0 5.35 36 0 0 123 [4.84] New pads 139 [5.47] Worn pads 147 [5.79] Measurements in metric, inches in brackets New pads 229.5 [9.04] Worn pads 237.5 [9.35] Disc Diameter - mm [inches] [10] [12] [14] [16] [18] [21] [24] [32] [36] 250 300 350 400 460 610 810 915 515 710 7 [100] Weight (caliper and thruster) - 7.82kg [17.24 lb] Air Pressure - bar [bsi]
2 Air Pressure - bar [bsi]
3 [44]
4 [58]
5 [29] (thruster only) - 1.32kg [2.91 lb] Volume displacement of thruster at full stroke is 300ml [0.08 gal]. Maximum Pressure 7 bar [100 psi] Maximum Braking Force = 6.9kN @ 7 bar [1551@ 100 psi] 1 [15]

The ratings shown on the above graph are based on fully bedded and conditioned brake pads with nominal friction coefficient µ=0.4.

2100 [1549]

1800 [1328]

Braking Torque - Nm [ft-lb]

For bedding-in and conditioning procedures see Publication M1060.

900

1200 [885]

600 [443]

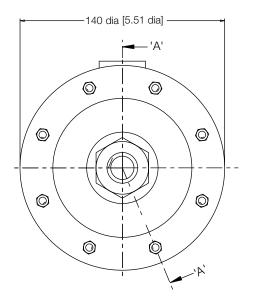

1500 [1106]

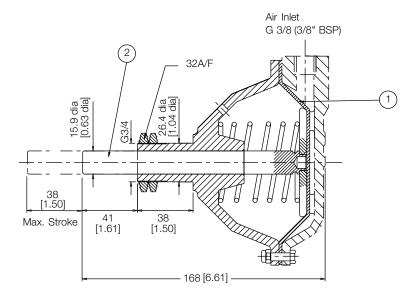

Braking Force is defined as the Tangential Force acting on the brake disc at the Effective Disc Radius. Braking Torque (Nm) [ft-lb] = Braking Force (N) [lbf] x Effective Disc Radius (m) [ft] where Effective Disc Radius = Actual Disc Radius - 0.03 [0.1]

2700 [1991]

Twiflex Disc Brakes must be used with Twiflex asbestos free brake pads. The use of any other brake pads will invalidate the warranty. Twiflex Limted reserves the right to modify or change the design without prior notice.

MRA Disc Brake Caliper - Pneumatically Applied, Spring Released

Measurements in metric, inches in brackets

Section 'A' - 'A'

This range of pneumatically operated brakes uses dry and filtered compressed air at pressures up to 7 bar [100 psi]. Pneumatic brakes require a control valve which may be operated either manually, or by pneumatic or electric signal.

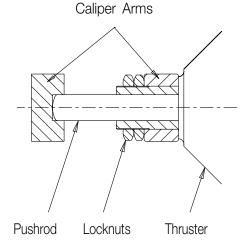

Should it become necessary to replace a diaphragm, ensure air supply is disconnected, remove the M5 bolts and the rear cap of the thruster. Remove the worn diaphragm; clean-up the contacting surfaces and re-assemble with the new diaphragm and bolts in position (Tightening Torque 5.7Nm [4.20 ft-lb]).

Thruster Part Number 7200056

Available Spares		
Item	Component	Part No.
1	Diaphragm Kit	7902801
2	Piston Rod Assembly	7200493

Thruster Fitment

- 1. Offer thruster to caliper making sure that both lock nuts are removed before placing push rod through caliper arm.
- 2. Fit lock nuts over the push rod and locate it's end within the slot of the other arm.
- 3. Tighten one lock nut to 50-60 Nm [36.88-44.25 ft-lb] then tighten the second nut against the first.
