

Warner Electric

Brakes

Clutches

Torque Limiters

Linear Actuators

Warner Electric is recognized as a global leader in electromagnetic clutch and brake technology.

Warner Electric offers the broadest range of standard, modified and custom-engineered solutions for brake, clutch and linear actuator applications in many industrial markets.

With over 70 years of experience, the Warner Electric brand name provides cost-effective power transmission solutions for applications in diverse industries including elevators, forklift trucks, medical, cranes, medical, printing, transportation and renewable energy.

Quality

As market leaders, Warner Electric continuously invests in people, technology and processes. The company has four manufacturing facilities, two located in France and two in the USA. All four plants are registered to ISO 9001:V2000 ensuring that product design and development, manufacturing and service are of the highest standard.

Our refined manufacturing processes and quality supply chain partners enable us to provide costeffective products that continually meet or exceed customer expectations.

Testing & Research

We offer the capability to produce prototype units for testing and evaluation by clients or using our own computer-controlled testing equipment to simulate the operating conditions of a specific application while shortening product development cycles.

Engineering and Application Expertise

A dedicated team of market-focused engineers and a technically superior manufacturing staff work together to provide customers with high-quality, application-specific power transmission solutions.

We utilize the "voice of the customer" during design and development which helps to ensure that our products meet the customer's precise specifications and performance requirements.

Global Sales and Technical Support

As part of the Altra Industrial Motion family of power transmission companies, Warner Electric provides sales and technical support in over 70 countries around the world including a large dedicated customer service, sales, and distribution operation in North America.

Printing/Packaging/Bottling Tens

enewable Energy

A full range of products that meet the performance challenges of industrial drivetrains

Whether it's a large clutch for an offshore installation or a high-speed/high cycle, clutch/brake assembly for a paper handling application, Warner Electric has the "Power of Experience" to provide the latest technology at the lowest cost with minimum lead times.

Clutches designed for smooth, soft starts, fast starts, speed changing, reversing and overload protection. **Brakes** designed for soft, cushioned stops, fast stops, positioned stops, fail safe stops and load holding. **Clutch/Brakes** designed for rapid cycling, indexing, jogging and soft, smooth starts.

A complete line of **Electric Actuators** is offered for light-duty, general-duty and rugged-duty applications. All are engineered for maintenance-free, long-life service and can be readily customized to suit specific requirements.

Actuator Controls are also available ranging from simple-to-use switch box controls for basic extend/ retract function, to state-of-the-art, microprocessorbased digital electronic controls using SMT design and manufacturing processes.

Standard Clutches and Brakes

- Electromagnetic, pneumatic, hydraulic or mechanically operated
- Single disc, multi disc, tooth
- Torque range: 1.7 to 81,900 Nm

Spring-Applied Holding Brakes

- · Single disc or twin disc
- Adjustable torque
- Dust cover and connector
- Torque range: 5 to 25,600 Nm

Packaged Clutches/Brakes

- Pre-assembled clutch/brakes
- Electromagnetic or spring-applied
- No wear adjustment
- Torque range: 7.5 to 970 Nm

Torque Limiters

- Friction (single or multi disc)
- Wet or dry use
- Balls/races or rollers
- Synchronised
- Adjustable torque
- Torque range: 5 to 25,600 Nm

Tension Control Brakes

- Friction
- Magnetic Particle
- Hysteresis
- Adjustable with wide electronic control offering
- Torque range: 0.07 to 450 Nm

Wrap Spring Clutches and Brakes

- Dry use
- Single or partial revolution
 Maintenance-free
- Torque range: 3 to 500 Nm

Custom and Modified Clutches and Brakes

- Engineered to meet specific customer requirements
- Developed in accordance with regulatory standards
- Electromagnetic, pneumatic, hydraulic or manual
- Single disc, multi disc, tooth

Linear Actuators and Controls

- Acme or ball screw
- Load range: 120 to 9800 N
- Speed range: up to 50 mm/s
- IP 65
- High performance motors
- Full line of controls
