

## RENEWABLE ENERGY

Svendborg Brakes | Stromag | Ameridrives | Warner Electric | Twiflex

### RENEWABLES

As leading multinational designers and manufacturers of innovative power transmission products, the companies of Regal Rexnord offer many critical drivetrain solutions for a wide range of renewable energy applications.

#### Brands:

##### Ameridrives

#### Rotor Brakes

Powerful engineered rotor brakes used for stopping and holding. Designed for minimal air gap for fast braking. Available from Stromag, Svendborg Brakes and Twiflex.

#### Hydraulic Power Units - Application Specific

Proven designs through thousands of installations around the world. Available in a variety of configurations. Available from Stromag, Svendborg Brakes and Twiflex.

#### Yaw Disc Resurfacing

Save time and money with our up-tower yaw resurfacing services that eliminates the need for removal of the nacelle.

Our resurface tools fits various turbine models. Contact your representative for information.

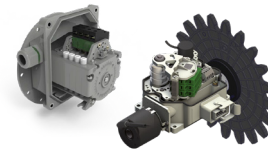

#### R&D & Test Center

Extensive testing in our full scale test center is second to none and your guarantee for top quality. We have a strong tradition for R&D investments and invaluable accumulated know-how. Our focus on innovation and testing is core to our company.

#### Yaw Brakes

Specially developed yaw brakes primarily used for holding and controlled yawing. Designed to minimize noise during yaw. Available from Stromag, Svendborg Brakes, Twiflex and Warner Electric.

#### Limit Switches

Stromag Geared Cam limit switches are specially designed to limit the yaw and pitch rotation of a wind turbine.

#### Service Tools

The lifting tool for yaw brakes reduces service time by up to 50% while simultaneously improving personnel safety.

Our groove tool reduces yaw noise by making precision cuts across the disc and reduces brake dust glazing by channeling the dust off the disc.

#### Genuine Spare Parts & Accessories

Authentic spare parts are worth far more than compromising on price, quality and safety. We guarantee all our products meet or exceed original supplied equipment and safety standards.

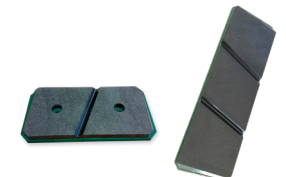

#### Rotor Locking Devices

Used to prevent the shaft from turning during maintenance or lock down. Engineered to handle large output torques. Available from Stromag, Svendborg Brakes.

#### Couplings

Ameridrives provides custom-designed, light weight couplings capable of transmitting high torques at high speeds while accepting significant levels of angular, radial and axial misalignment. Requires no lubrication. Available in composite materials for electrical insulation.

#### The Green Alternative

Designed to help reduce the impact on our environment. The brake pads are developed in accordance to REACH standards.

#### Service Organization

Service Support line is available 24/7/365. Our technicians are available for scheduled preventative maintenance and emergency situations.
