

Series F - Flexible Couplings

Sizes 200-207

Larger Bore

Higher Torque

F Size	Max Bore		Torque in-lbs		Max RPM Unbalanced	Dimension (Metric)						Weight lbs(kg)	
	Square Key Inch	Metric with Std Metric Key mm	in-lbs	NM		B	C	E	F	G

207	9.62	265	1,144,800	135,578	1,800	20.75 (527.1)	13.50 (342.9)	8.69 (220.7)	0.38 (9.7)	17.75 (450.9)	16.00 (406.4)	19.25 (490)	973.0 (441.7)

Drill to Order

- Couplings can be drilled for AGMA Standard Exposed Bolt Pattern, AGMA Standard Shrouded Bolt Pattern (Sizes 201.5 – 205.5)
- Couplings can also be drilled to order with customer specified bolt pattern. Many common metric patterns available
- Ratings based on +/- ¼ ° combined Angular and Parallel Misalignment.
- Higher Misalignment Ratings available, contact Factory
- Accurately machined medium carbon steel hubs and sleeves. Alloy materials available, contact Factory.
- Couplings incorporate positive O-ring seal. Buna N Oring seals provided. Viton Oring seals available for temperatures over 250° F.
