# American Made Products for American Mills

Ameridrives Americardan U-Joints and Amerigear gear couplings and mill spindle shafts are designed and manufactured in the USA

## American ingenuity and quality are built into all our products

We provide real value to metal producing and processing mills in the US. Our experienced application engineers routinely develop solutions that reduce mill downtime and improve productivity.

Ameridrives is the only company that makes all its gear couplings, spindles and U-joints in the USA. Our dedicated teams in Erie, Pennsylvania and San Marcos, Texas utilize advanced testing, analysis and manufacturing processes to ensure that our quality products provide long-lasting performance in tough hot and cold mill applications.

## Ameridrives advantages for US mills:

- Unique, high-quality mill-proven solutions
- Faster response and delivery compared to off-shore competitors
- Expert mill application engineers available to provide analysis of repeated coupling/spindle/U-joint problems on any mill machines
- Visits to your facility (or ours) can be easily arranged
- Metric-sized solutions available to fit all OEM mills
- Fast-turnaround repair and maintenance service for Ameridrives and competitive brand U-joints and products
