

FCVR-B OPTION FOR THE RBX SERIES

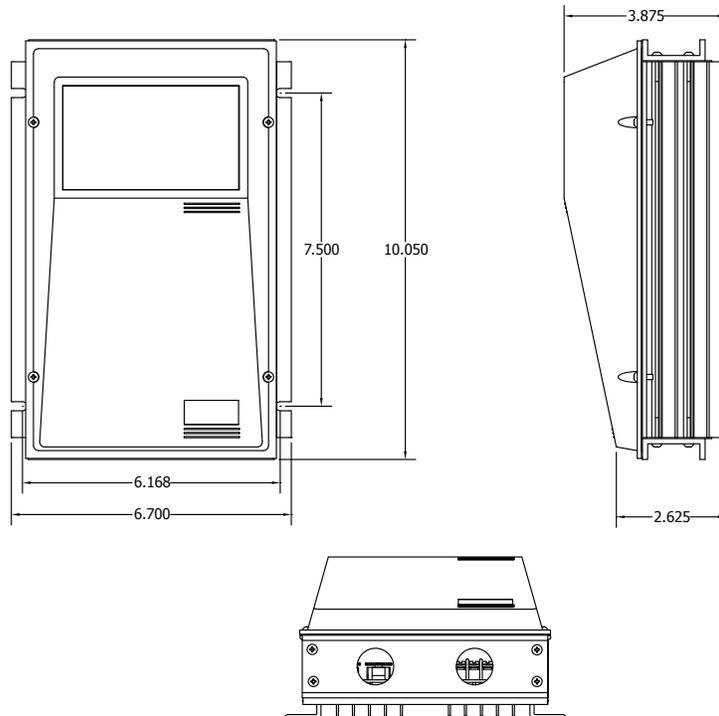

This is a blank cover kit to be used with RBX2C, RBX2C-RA1, RBX2C-RA2, and RBX3C which will convert the chassis control into a NEMA 4/12 control. This kit will include endplates, gaskets, and hardware and is intended that the drive will be operated remotely - not from any covermounted pot / switch.

Exploded View

Note:
The #5 3/8" screws will be installed in the Cover and the #5 5/8" screws will be installed in the endplates.
