

CSK One Way Bearing Clutches

 **Formsprag Clutch**[®]
Altra Industrial Motion

Overrunning Indexing and Backstopping Clutches

Formsprag and Stieber have been designing, manufacturing and delivering dependable, long-lived, precision power transmission products for over 50 years, providing one of the broadest lines of overrunning clutches in the world.

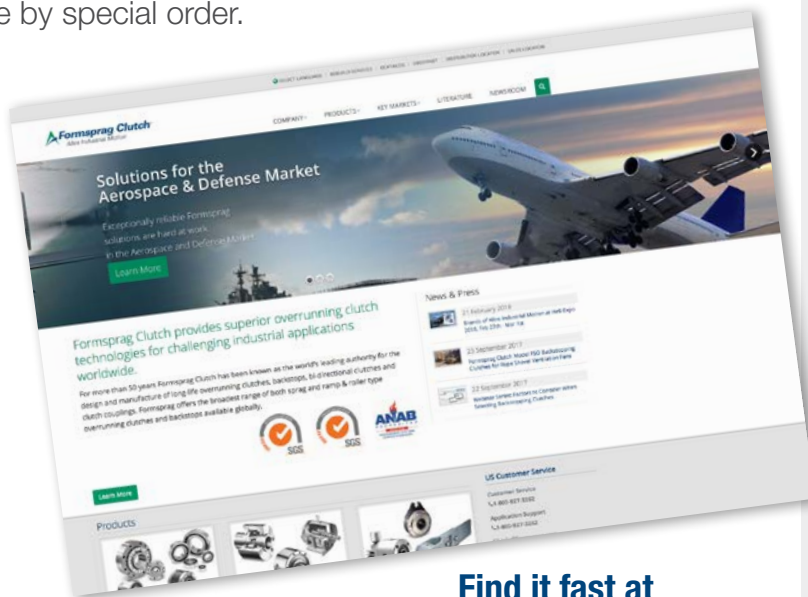

Formsprag and Stieber overrunning clutches deliver thoroughly proven, dependable power transmission. Careful selection of highest quality materials, precision manufacturing by experienced craftsmen, conscientious assembly, and rigid adherence to detail guarantee a reliable, quality product.

Overrunning clutches handle torque loads up to 700,000 lb.ft. (949200 Nm). Other sizes and designs are available by special order.

CSK Series Clutches

Bearing envelope (62 series) design sprag clutches for overrunning, indexing and backstopping applications.

Check Out

Use our online interactive eCatalog to find what you need just in a few clicks. Input your application requirements using many helpful aids to identify performance criteria, and the right product will power its way to the top of the list.

- Exclusive “Competitor Interchange” feature lets you enter a competitor part number and find the specific replacement Formsprag model
- Fill out the Application Data Form to get assistance in determining your selection
- Submit an online RFQ to the distributor of your choice

Find it fast at
www.Formsprag.com

Unique sprag design provides a better way to achieve a higher size for size torque rating!

Design Features

- Four different mounting designs
- Wide bore range of 8 to 40 mm
- Self-contained, compact ball bearing design
- 2RS, lip-sealed design
- No maintenance, grease lubricated for life
- High speed range from 0-15,000 RPM
- Longer wearing life with Formchromed Sprags
- 27 different designs in stock
- Operating temperature range: 21 to 140°F (-6 to 60°C). Special grease available for operating temperatures: -40 to 212°F (-40 to 100°C).
- Outside dimensions same as 6200 Bearing Series

Three Mounting Configurations

Press Fit

The Model CSK clutches must be mounted with a press fit on both the outer and inner races. The shaft diameter tolerance must be held to a n6. The bore of the housing for the outer race should be a N6 tolerance.

Keyseating Clutch Bore

The Model CSK..P clutches with a keyseat in the bore must be secured or axially retained on the customer's shaft by customer supplied snap ring, set collar, spacer or step in shaft diameter. The CSK..P outer race is mounted with a press fit into the bore of the housing.

Keyseat In Clutch OD & ID

The Model CSK..PP clutches have a keyseat on both the outer and inner race. The CSK..PP clutches must be axially restrained by the use of customer supplied snap ring, set collar, spacer, etc.

CSK Series CSK Advantages

CSK

Type CSK is a sprag type clutch integrated into a 62 Series ball bearing (except sizes 8 and 40). It is bearing supported, shipped grease lubricated and protected against dust larger than .012" (.3mm) diameter. The use of additional "nylos" type seals is recommended especially when the working temperature exceeds 122°F (50°C).

Oil bath lubrication is also possible if the original grease is first flushed out using a suitable solvent.

Torque transmission is ensured by a press fit assembly into a rigid outer housing with N6 tolerance, and onto a shaft with n6 tolerance. The initial bearing radial clearance is set at C5, and is reduced if using the press fit as specified.

One race may be glued. If both races are to be glued, performance will be reduced or a C3 bearing clearance will be necessary.

Operating temperature range: 21 to 140°F (-6 to 60°C). Special grease available for operating temperatures: -40 to 212°F (-40 to 100°C).

CSK..2RS

CSK..2RS clutches are .197" (5mm) wider than a standard 62 Series bearing, as they are equipped with lip seals for washdown applications.

Dimensions inches (mm)

Size	Bearing Series	CSK		CSK..2RS		Bore Sizes	
		Dh5 in (mm)	L in (mm)	L in (mm)	d in (mm)

40		284 (385)	3,000	0.89 (10)	0.62 (7)	3497 (15.54)	2756 (12.25)	1.10 (0.5)	1.32 (0.6)

* CSK8-2RS has only one lip seal on ball bearing side.

The torque ratings are based upon 1 million load cycles at full catalog torque which is a standard in the North American Industrial Market.

CSK Series CSK Clutches

CSK..P

CSK..P has the same construction and outside dimensions as type CSK, but has a keyway on the inner race.

These clutches can be mounted on a shaft to k6 tolerance.

The outer race must be pressed into a rigid housing to N6 tolerance.

CSK..P
Single Keyway

CSK..PP
Dual Keyways

CSK..2RS

CSK..2RS clutches are .197" (5mm) wider than a standard 62 Series bearing, as they are equipped with lip seals for washdown applications.

CSK..PP

CSK..PP features a keyway on both the inner and outer race. The recommended mounting tolerances are k6 on the shaft and K6 in a rigid housing. An h6 tolerance on the shaft or H6 in the housing are also acceptable for a light press fit assembly.

Operating temperature range: 21 to 140°F (-6 to 60°C). Special grease available for operating temperatures: -40 to 212°F (-40 to 100°C).
