

Perkins 404F-22 Tier 4i/4F

Precision Machining Of The Housing
Ensures Alignment And Reduced Wear
On The Drive Coupling

Pump Mount Housing Features

- Manufactured for Perkins Tier 4i/4F (Natural and Turbo) compliant engines with flat-faced flywheel and engine back plate.
- Provides tier 4 final mounting for DPF bracket
- Pump mount will accommodate earlier tier engines
- Optional mag-pickup available if required
- Pump mount housing is produced from a Class 30 Gray Iron, which will aid in vibrational dampening to the pump
- Fits standard SAE A, B, & C pumps, and European Group 2 & 3
- All housing are coated with a black E-coat for rust prevention. The black E-coat finish is certified to withstand up to a 1,000 hour salt spray test.
- Guardian also offers several coupling options to compliment the pump mount housing
