

# Marland Clutch Certified Rebuild Center in North America

Marland remanufactured clutches look like new, perform like new and are backed by the same 3 year warranty as our new units.

Marland Clutch, part of Altra Industrial Motion, has appointed S & S Equipment & Supply, LTD to be our Master Stocking Warehouse and only Authorized Marland Rebuild and Service Center for North America. S & S Equipment & Supply, LTD is the headquarters and administrative branch of the service. Its subsidiary company, Paducah Gear & Machine, LLC (PGM) located in Calvert City, Kentucky, performs all repair and rebuilding for all Marland products including BC-MA, CECON and CEBMAG clutches to "like new" condition with a new product warranty. In most instances, your Marland products can be refurbished for substantially less than the cost of a new replacement clutch.

As the Marland products are received at the repair facility, they are inspected, tested, quoted for rebuild, and if authorized, repaired to complete and exact standards in which the original Marland products are manufactured. The process in which this is accomplished is:

- Inspect and replace bearings, seals, springs, gaskets, stop-lugs, alloy steel rollers, aluminum cages, and fasteners as required.
- Inspect and precision grind the outer race and cam if required.
- Assemble and test to meet Marland original design and performance specifications.
- Paint, crate, and prepare for shipment.

The inspection and repair will be done in the shortest possible time frame with S & S Equipment and PGM working to accommodate your shut down schedule.

The newly rebuilt backstop or clutch will then carry a new clutch 3 year warranty. In the event a clutch becomes cost prohibitive to repair, S & S Equipment is also the leading stocking distributor of new units outside the of the Marland Clutch Factory.

Marland Clutch Products perform in several key markets including Petrochemical, Mining, Metals, Power Generation, and Cement Manufacturing. Applications include dual fan drives, inclined conveyors, kiln drives, and pumps.

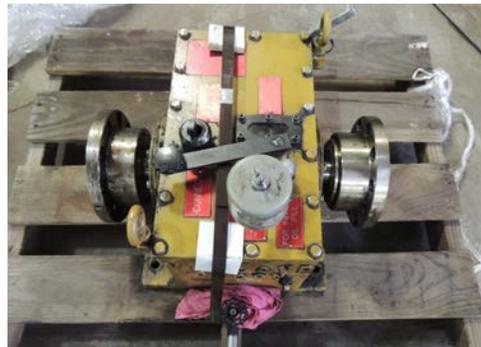

### Rebuilding All Brands

Marland and S & S, with over 200 years of combined Engineering and Product expertise, are now able to rebuild ANY Backstop, weather Sprag or Ramp/ Roller. Contact S & S Equipment & Supply to assure your rebuild uses genuine Marland Products and Services to avoid sub-standard counterfeit work.
