

GROOVE TOOL YAW NOISE REDUCTION

ANTI-GLAZING GROOVE SOLUTION

Image: Groove tool illustration
purpose only, not exact model.

DESCRIPTION

One of our noise reduction solutions is the anti-glazing groove solution, which establishes a stable condition for the friction surface of the brake pads. One or multiple grooves are cut into the brake disc to remove yaw noise and prevent glazing. The yaw disc brush ensures complete removal of dust from the disc surface and from grooves. The groove solution improves wear rate.

SPECIAL FEATURES

- Reduce wear rate
- Stabilize friction levels of the pads
- Reduce the possibility of leakages on caliper

SPECIFICATIONS

- Weight of complete tool assembled: 8.15kg
- Overall dimensions: (L)614x(W)385x(H)168mm
- Utilizes a Mikita 6D0810C low speed grinder - supplied separately
Special grinding disc: 50mm (OD) X 4.2mm (W)
- Grinder disc holder: 6mm shaft
- Patented
