

Custom Design Clutches and Brakes

Applying Clutches & Brakes	2-3
Design Features	4-5
Selection	6-11
Mounting Examples & Options	12-13
Custom Design Product Line	
Size 120	Clutches 14-17
	Clutch Couplings..... 90-93
	Brakes..... 146-147
Size 170	Clutches 18-21
	Clutch Couplings..... 94-97
	Brakes..... 148-149
Size 250	Clutches 22-25
	Clutch Couplings..... 98-101
	Brakes..... 150-151
Size 400	Clutches 26-29
	Clutch Couplings..... 102-105
	Brakes..... 152-153
Size 500	Clutches30-31, 72-73
	Clutch Couplings..... 106-109, 134-137
	Brakes..... 154-157
	Clutch Brake Couplings.....208-211, 214-217
Size 650	Clutches 32-35
	Clutch Couplings..... 110-113
	Brakes..... 158-159
	Clutch Brake Couplings..... 212-213
Size 825 & 1000	Clutches36-51, 74-81
	Clutch Couplings..... 114-121, 138-141
	Brakes..... 160-167
	Clutch Brakes..... 188-195
	Clutch Brake Couplings..... 218-221
	Motor Brakes 176-183
Size 1225	Clutches52-59, 82-85
	Clutch Couplings..... 122-125, 142-143
	Brakes..... 168-171
	Clutch Brakes..... 200-203
	Clutch Brake Couplings..... 224-225
	Motor Brakes 184-187
Size 1225/1000	Clutch Brakes..... 196-199
	Clutch Brake Couplings..... 222-223
Size 1525	Clutches60-71, 86-89
	Clutch Couplings..... 126-133, 144-145
	Brakes..... 172-175
Size 1525/1225	Clutch Brakes..... 204-207
	Clutch Brake Couplings..... 226-227

Custom design with off-the-shelf components

For maximum mounting versatility and design flexibility Custom Design products may be designed into the most demanding and space restrictive applications. They require additional engineering and assembly capability, but their lower initial cost and wider range of sizes makes them an ideal consideration for many applications. Like all Warner Electric packaged clutches and brakes, they never need adjustment, and they are built to the same standards of quality and performance.

Wide Range of Sizes

Assembled around the basic components of an electric clutch-brake, magnet and armature, custom design products come in a tremendous range of sizes, torque ratings and configurations.

Custom Design Clutches and Brakes

Product Line

Clutches

SF series

Page 14

Stationary Field Design

- Flange or bearing mounted styles
- The SF design eliminates collector rings and brush-holder. Ideal for adverse environmental conditions. Mounting tolerances are generally more critical than the PC design.

PC series

Page 72

Primary Design

- Current is carried through brushes and the collector ring to the rotating magnet. The PC design is less expensive than the SF design.

Application

A clutch is used when the load is driven to a parallel shaft through sheaves, belts, sprockets or gears.

Clutch Couplings

SFC series

Page 90

Stationary Field Design

- The SFC Series clutch couplings employ the same basic components as the SF design except for a splined hub and adapter which serves as a coupling for in-line shaft applications.

PCC series

Page 134

Primary Design Coupling Units

- The PCC Series clutch couplings employ the same basic components as the PC design except for a splined hub and adapter which serves as a coupling for in-line shaft applications.

Application

A clutch coupling is used to couple two inline shafts.

Brakes

PB series

Page 146

Brake

- The PB Series brakes consist of a magnet, armature and mounting hub in a very simple and extremely compact design.

Application

A brake is used when a rotating load is to be stopped.

Clutch/Brake Combinations

PCB series

Page 188

Primary Style Clutch/Brake

- The PCB Series clutch-brakes combine a PC clutch and a PB brake into one compact design.

Application

A clutch-brake is used to combine the functions of a clutch and a brake in a compact assembly.

MB series

Page 176

Motor Brake

- MB motor brakes are composed of a PB Series brake mounted on a NEMA C-face adapter and cover assembly.

Application

A motor brake mounts directly on the end bell of a double shafted motor.

SFPBC series

Page 208

Stationary Field Clutch/Brake Coupling

- The SFPBC clutch/brake coupling series combines an SFC clutch coupling with a PB brake.

PCBC series

Page 214

- The PCBC clutch/brake coupling series combines a PCC clutch coupling with a PB brake.

Application

A clutch-brake coupling is used to combine the functions of a clutch coupling and a brake.
