The ERS VAR 15 Brake

Electrically Released Brake
for Stage & Theater Applications

The ERS VAR 15, an electrically released safety brake with fixed magnets and a floating friction disc, is a highly modular braking system. From 2 up to 4 magnets in standard configuration, it reduces over-torque issue compared to standard double brake when more than 2 magnets are used (redundancy on 1 magnet).

Features

- Compact and modular design with torque from 2x180Nm up to 4x500Nm
- From 2 up to 4 magnets in standard configuration
- Low noise level through the life of the brake (<50dB(A) out of box)
- Speeds up to 1800rpm
- Equipped with micro switch or proximity sensor
- Nearly maintenance free (further information in our service manual)
- Overexcitation (dual voltage) or single voltage
- Customization on request
- According to Norm Requirements (BGV-C1; DIN 56950-1; EN81-20/50, DGUV §17...)

Several options available such as hand release, dust cover, connectors, ...
