

## Dependable Torque Control Products

Wichita clutches and brakes provide the high speed acceleration and deceleration that are essential in modern process equipment. They are available in a variety of designs and mounting configurations and are used extensively around the world by leading OEM's in metal working, steel, pulp/paper, material handling, paper converting, marine, mining and energy.

Wichita provides custom designs to meet your particular application requirements, giving you the right solution to meet all your power transmission needs.

## General Warnings

Do not repair clutches and brakes (with or without a guard) while they are rotating or with a load engaged.

Do not disassemble while air-tube is pressurized.

Heavy components should be handled carefully. If dropped they can cause serious bodily injury.

Caution, clutches and brakes generate heat. Allow cooling time before normal maintenance.

Do not exceed the recommended maximum air-pressure listed in the Specification Table for each type of unit.

Do not operate clutches and brakes without a guard.

Internal springs under compression. Please refer to installation and maintenance manuals for proper disassembly procedures.

Disable all power sources (electrical, pneumatic, mechanical, etc.) before servicing equipment.

Consult Wichita Installation and Maintenance manuals for proper disassembly and assembly procedures.

Wichita clutches and brakes are designed to be operated with original Wichita replacement parts. Using non-original replacement parts in Wichita clutches and/or brakes voids all warranties issued by Wichita Company Limited. Wichita also specifically disclaims any responsibility for damage to persons or property which may be related to the use of said brakes and clutches which employ non-original parts.

# Customer Service

For over 50 years Wichita Clutch has provided engineered solutions to the most demanding torque control problems.

Founded in 1947, Wichita Clutch began manufacturing air-tube disc clutches and brakes. Today, we are recognized as a global leader in heavy-duty power transmission.

## Total Support

Superior customer service is a common denominator at Wichita Clutch. It is this philosophy that places the needs of our customers at the central focus of our efforts. By implementing Cellular Manufacturing, Kan-Ban and Just-In-Time scheduling, our customers receive the products they require precisely when needed, and our computerized order entry systems allow quick and timely answers to your questions. An international distributor network puts local Wichita specialists only a phone call away.

## Assured quality

Wichita is accredited to ISO 9001:2015 quality standards, and approved by the world's Ship Classification Societies. Wichita quality control doesn't end with manufacture though; our service and support continues long after installation with a help-line available 24 hours a day, every day of the year. Wichita also offers Genuine Wichita and Industrial Clutch parts and spares through our QuickServe facility, and on-site assistance from experienced engineers.

*Wichita Clutch Plant  
Bedford, UK*

## Engineering

Wichita has significant resources dedicated to the engineering disciplines required to design, manufacture and apply our heavy duty clutches and brakes. Our application engineers are able to provide timely response to your enquiries through our Computer Aided Product Selection (CAPS) system.

Wichita Design engineers utilize the latest 3D CAD systems in the design of new products, and dedication to emerging technologies has allowed us to solve the most challenging applications in heavy-duty power transmission.

From the simple air-tube disc clutch design that allows for greater torque capacity in multiple plate units to more complex bespoke solutions, years of engineering development have produced a variety of designs used extensively by leading OEM's in all major heavy duty applications.
