

Lamiflex Couplings is a premier manufacturer of high-speed disc couplings and related power transmission products.

Lamiflex offers a complete line of high performance coupling products including, flexible disc couplings, elastomeric couplings, rotary bearing protectors and coupling guards.

Flexible Disc Couplings

Flexible units designed for infinite life and manufactured in highly resistant 300 series stainless steel. Lubrication not needed. High reliability and low maintenance. No parts with mechanical wear. High temperature operation. High level of inherent balance. Anti-corrosive protection.

Shims for Alignment

The Powershim line includes different sizes with openings for mounting onto base screws: M12, M18, M27, M36 and M52. Cost reduction as well as a reduction in alignment time. Stock control, safety and reliability. Machine alignment with precision.

Coupling Protectors

Constructed in galvanized carbon steel. Available in 6 sizes (CG-100 to CG-500). Maximum Axle Diameter to 220mm. Maximum Length to 720mm. In compliance with norm NR-12 art 12.47 and 12.50.

Bearing Isolators

Manufactured with non-sparking brass and increases the useful life of bearings. Protects the environment. Permanent sealing. Easy installation. No contact and no wear and tear.

Floating Shafts

Made from a diverse range of materials that fully meet the needs of the operation. High durability increases the equipment reliability. Safety in the event of failures. Savings in operational costs. Ease of installation. Appropriate for vertical movements.
