

RENEWABLES

As leading multinational designers and manufacturers of innovative power transmission products, the companies of Altra Industrial Motion offer many critical drivetrain solutions for a wide range of renewable energy applications.

Rotor Brakes

Powerful engineered rotor brakes used for stopping and holding. Designed with minimal airgap for fast braking. Available from Stromag, Svendborg Brakes and Twiflex.

Yaw Brakes

Specially developed yaw brakes primarily used for holding. Designed to minimize noise during yawing. Available from Stromag, Svendborg Brakes and Twiflex.

Rotor Locking Devices

Used to prevent the shaft from turning during maintenance or lock down. Engineered to handle large output torques. Available from Stromag, Svendborg Brakes.

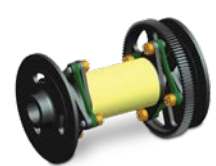

Hydraulic Power Units - Application Specific

Proven design through thousands of installations around the world. Available in a variety of configurations. Available from Stromag, Svendborg Brakes and Twiflex.

Limit Switches

Geared Cam limit switches for yaw drives specially designed to stop the rotary motion of wind turbines safely. Available from Stromag.

Couplings

Ameridrives provides custom-designed, light weight couplings capable of transmitting high torques at high speeds while accepting significant levels of angular, radial and axial misalignment. Requires no lubrication. Available in composite materials for electrical insulation.

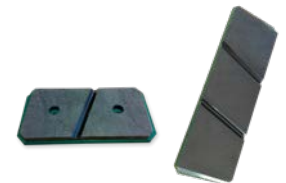

OES Pads

Original Equipment Supplied brake pads is a lower cost alternative without compromising on quality and safety.

Service Tools

The new Lifting Tool for yaw brakes reduces service time by up to 50% and increases safety simultaneously. Our Grinding Tool can help reduce yaw noise by cutting a groove in the disc, which reduces glazing.

The Green Alternative

To focus on environmental issues, our organic friction materials are developed according to the REACH legislation.

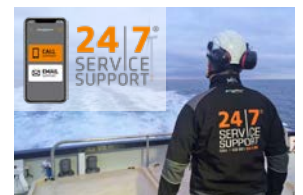

R&D & Test Center

Extensive testing in our full scale test center is second to none and your guarantee for top quality. We have a strong tradition for R&D investments and an invaluable accumulated know-how. Our focus on innovation and testing is core to our company.

OEM Spare Parts & Accessories

OEM spare parts are worth far more than compromising on price, quality and safety. We guarantee that all our products meet or exceed local regulations and safety standards.

Service Organization

Service Support line is available 24/7/365. Download our App for contact details. To keep downtime to a minimum, our technicians are available for scheduled preventative maintenance and emergency situations.
