

# CAGE CLAMP® Technology

STANDARD FOR GEARED MOTORS OF  
THE SERIES BF, BG, BK, BS AND BM

## SAVES TIME AND MONEY!

**MOTORS UP TO 22 KW ALSO IN EXPLOSION  
PROTECTION DESIGN**

### Cost reduction during connection

- Public timing tests have confirmed, that the electrical connection of a cable by means of CAGE CLAMP® technology saves up to 75% working time compared with the classic screw connection. More savings can be seen when connecting a gear motor with the classical terminal block.

### Simple handling

- Cable connection from the top.
- Very easily accessible.
- The CAGE CLAMP® spring is pressed, and the cable inserted from the front, i.e. in the field of vision of the installation engineer.

### Cost saving in material and tooling

- Multicore cable ends, cable eyes or cable ring eyes are no longer required.
- Tools such as crimping pliers are no longer needed.
- Inadvertently over tightening or breaking of the terminal bolts and the procurement of a new terminal block belong to the past.
- No need to search for or re-procure nuts and washers for the terminal blocks, which have fallen down.

# CAGE CLAMP® Technology

STANDARD FOR GEARED MOTORS OF THE SERIES BF, BG, BK, BS AND BM

## Vibration and shock resistant

- Vibration and shock result neither in conductor damage nor in a measurable contact interruption.
- The connection is service free.

## Connectable wire cross section

- Suitable for all copper wires from 0.5 mm<sup>2</sup> to 16 mm<sup>2</sup> (flexible wire up to 25 mm<sup>2</sup>).

## Type of conductors

- The CAGE CLAMP®-connector can clamp the following copper wires:

## Connector strip

- Easy-to-fit-connector allows rapid change from star to delta.
