OVERLAND CONVEYOR POWERTRAIN SOLUTIONS

Conveyors are essential for moving materials through demanding mining operations. When systems are not aligned with real-world operating conditions, unplanned downtime can result in significant production losses.

Regal Rexnord delivers end-to-end powertrain solutions designed to help overland conveyor drive systems perform reliably in harsh conditions. By supplying components representing up to 82% of the conveyor drive system for the configuration shown from one partner, Regal Rexnord helps simplify sourcing, improve component compatibility, and reduce the risk of unplanned downtime.
