

LowerPro System

SAFETY LOAD LOWERING

THIS SYSTEM ALLOWS SAFE AND CONTROLLED LOWERING OF THE LOAD

The LowerPro system includes advantages of ergonomics and safety. In the event of a power failure or special conditions, the technician is able to control the lowering of the load quickly and effortlessly, in optimal safety conditions.

It can be easily brought to the installation site and connected.

It is fitted with a dead-man safety device and can be fitted with electrical safety function (double OP3) in case of load overspeed and/or high disc temperature detection. A control wheel and pressure gauges provide utilisation comfort and precise control.

Stromag™ offers training in real conditions (load 8T, lowering height: 5m), consult us.

ERGONOMICS

Comfort in use
Effortlessly rechargeable energy reserve

SAFETY

Lowering possible in case of power failure
Dead man safety device

PRECISION

Lowering controlled with precision by means of steering wheel and pressure gauges

FACILITY

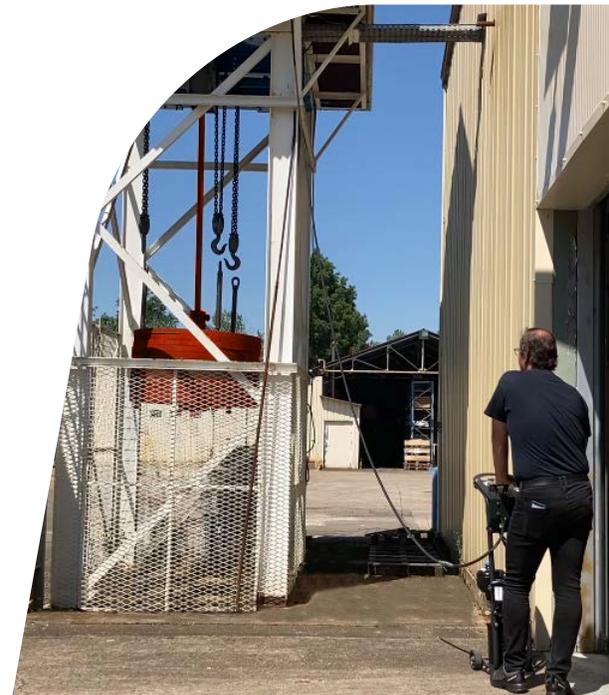

Easy transport and connection (wheels, quick couplings)
Starting up by our team

OPTIONS

Electrical safety
Accessory kit

Accessory kit

- Electric screwdriver
- Charger
- Pyrotechnic probe
- Capillary hose: Ø4 / length: 10 to 50 m (10 meter modules)

Simulation in real conditions - 8T lowering

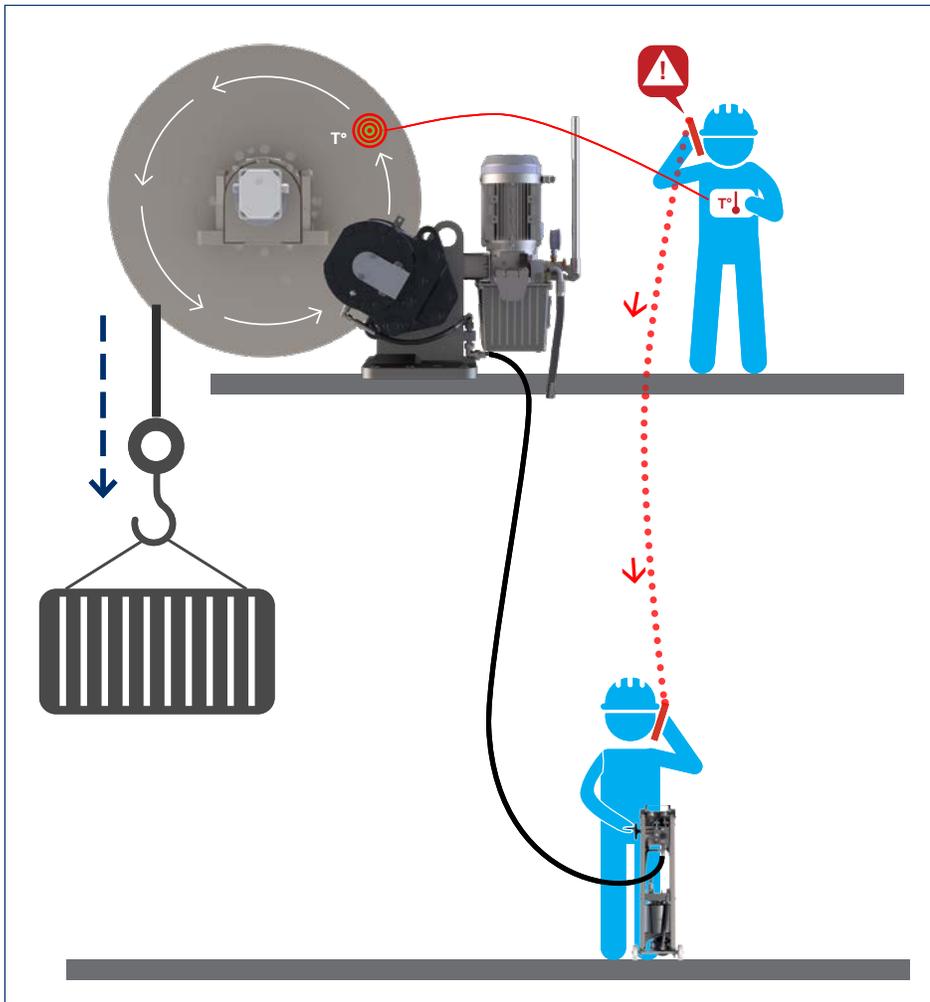

LOWERPRO SYSTEM

SAFETY LOAD LOWERING

LOWERING IS AN EXCEPTIONAL OPERATION

To ensure safety, 2 people are necessary to carry out a lowering:

- 1 person to control the lowering / action on the LowerPro
- 1 person to monitor disc temperature or/and load speed
