

COOLING SYSTEMS FOR INDUSTRIAL APPLICATIONS

Systems can be designed for any application where water-glycol or oil is used to cool gearboxes and other equipment

Well-recognized as a leading designer and manufacturer of braking systems for a variety of industries, including wind turbines, Svendborg Brakes has also become a supplier for wind turbine cooling systems.

Building on our broad application knowledge spanning many major markets, combined with our extensive cooling system experience, Svendborg Brakes now offers custom cooling systems for all types of gearboxes and equipment utilized in a wide range of industrial applications including:

- **Mining:** Conveyors, ball mills, cement mills, and conveyors
- **Marine:** Winch and primary drives
- **Oil & Gas:** Drawworks and eddy current brakes
- **Power Gen:** Converters and generators
- **General Industry:** Paper and steel mills, cranes, test benches, and hydro power

Our reputation for exceptional engineering, project management and delivery performance provides our customers with peace of mind. As part of our comprehensive support, we can supply material data sheets and records from our in-house production and destructive tests. We can accommodate customer audits and inspections and routinely work with all major certification organizations including ABS, DNV, GL and TUV.

Svendborg Brakes has in-house service teams in Australia, North America, South America, Germany, Czech Republic, South Africa, China, India and Denmark.
