

# PISTON EXTRACTOR

Ø90 & Ø120MM PISTONS

## DESCRIPTION

Designed and developed by Svendborg Brakes engineers. Safe and fast removal of brake pistons from the yaw brake 90 and 120 series during service and repair.

## HOW TO USE

- Handle rotation makes threaded spindle turn and pull out piston from brake yoke.
- Brake pistons are removed by rotating / turning handle after magnet captures piston.

## SPECIAL FEATURES

- Easy Use
- Improved Safety
- Reduction in Seal and Piston Install/Removal Time By Up to 50%
- Reduced Down Time & Costs
- Reduced Technician Fatigue
- Easy Transportation

## SPECIFICATIONS

- Weight of complete Piston Extractor tool: 6.5 kg
- Power supply for control box: 100-240VAC 50/60Hz - 24DC - 1.25A
