

HYDRAULIC BRAKING POWER FOR STEEL WORK CRANES

PROBLEM

Steel work cranes require robust and adaptable braking systems that can handle heavy loads and operate reliably in demanding industrial environments. The challenge lies in integrating high-performance brakes with hydraulic systems that offer flexibility and control..

SOLUTION

Svendborg Brakes provided a tailored solution by installing 2 x BSFH 500 brakes on a steel work crane in Luxembourg. These brakes were paired with a BSFI 3100 MS system, featuring a hydraulic power unit option to ensure responsive and reliable braking performance.

HIGHLIGHTS

- Heavy-duty, spring-applied, hydraulically released
- Integrated with a hydraulic power unit for enhanced control and responsiveness
- Custom Hydraulic Options
- Reliable Performance
- Compact Integration
